How do you determine RIGHT from WRONG? Is there really a single benchmark of values that fits all generations, political parties, and cultures? What is the Christian response to this question? In the world, rapidly growing technologies, media influences, and the always changing morals make it difficult to keep track of acceptable behavior. Content on television, radio or the Internet today bring into the open images, subjects and ideas that were considered immoral or taboo only a few years ago. Can the Bible be used to determine right and wrong in the 21st Century? Can we hold on to old fashioned values and expect those ideas to sustain us today? Dr. Bell's analysis may well surprise you! His new book, The Love Ethic, is sometimes provocative, occasionally humorous, and at times controversial. It draws from a wealth of historical and current events everything from Martin Luther to "I Robot" and down to the age of the Digital Natives. Want help in figuring out what's right and what's wrong? The Love Ethic may be for you!
